

PRESS RELEASE

Qu-Test and Qu-Pilot projects are excited to have launched the Open Call. We invite you to STEP INTO THE FUTURE OF QUANTUM!

Open Call in short

Qu-Test and Qu-Pilot are Horizon Europe projects that develop, upgrade, and provide infrastructure for testing, respectively give access to pilot production facilities for quantum technologies in Europe. Through the Open Call, the two projects offer services to EU-based quantum technology companies without the need for significant early-stage infrastructure investments. Within Qu-Test, the offered services cover testing and characterization of quantum devices and systems for computing, communication, and sensing. In Qu-Pilot, the offered technologies and services concern superconducting, photonics, semiconducting, and diamond platforms enabling technologies for quantum computing, communication, and sensing. The services can be accessed for free through the ongoing Open Call.

Open Call step-by-step

What? The Call is open to all EU companies in search of support services incorporating cutting-edge technologies in quantum computing, communication, and sensing.

Who? The Call is open to companies of all sizes. The applying companies must be established in one of the member states of the European Union, Iceland, Norway or Israel, with majority ownership and control therein.

When? The Call will be open from 1st June 2024 until 31st March 2025. Applicants can apply anytime within this interval.

Why apply?

- By partnering with experts in the field, applicants can gain insights, knowledge, and guidance.
- This process can provide valuable feedback and validation, helping to refine and improve its market readiness.
- The services are for free (100% funded).
- By leveraging independent services, applicants can accelerate the development timeline of their projects.
- Working with the Qu-Test and Qu-Pilot networks through the Open Call process can expand an applicant's network.

Be one step ahead
